

# Powering the new Blockchain Network Infrastructure

## Let's Make the Blockchain Revolution a Reality

Splend foresees blockchain becoming “The New Network of Trust”, capable of processing hundreds of millions of transactions per second for millions of users simultaneously.

We aim to power the new Blockchain Network by overcoming the blockchain limitations in scalability, security and latency. Our team has three decades of experience in solving very similar problems during the past computing platform revolutions.

Splend has developed a groundbreaking proprietary technology platform - **Integrated Blockchain Architecture™ (IBA™)**.

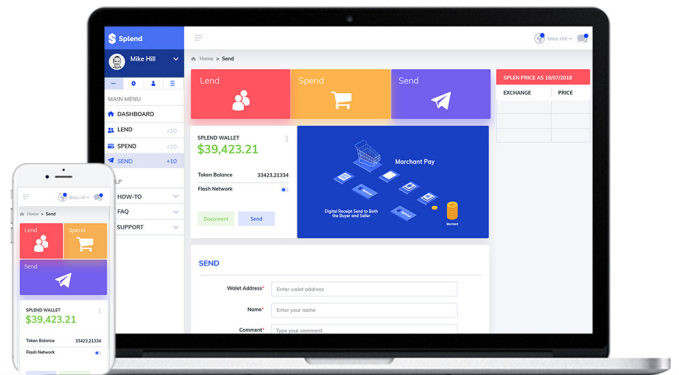

IBA™ represents a scalable systems approach to partitioning the blockchain's functionality between software and hardware to solve existing bottlenecks and provide optimal transactions performance. IBA™ enables instantaneous crypto transactions regardless of the numbers of users.

## Splend is Well Ahead of the Competition

- Unprecedented speed for near-instant crypto transactions
- Zero fee services, i.e. crypto payments and transfers, microloans, virtual card issuance, etc.
- Uncompromised Security. 12-layer security shield against any malicious attempts
- Complete One-Stop Solution provides cross-platform functionalities

## First implementation is Already Here

With an initial focus on the Fintech Services, Splend has crafted the **Universal CryptoWALLET™** application with an associated blockchain service available now. The product enables a total personal finance experience for all users. It allows them to access digital currencies and perform near-instant, inexpensive and secure crypto transactions.

## Professionals On Board

- Founders and senior executives with 25 years of experience in Silicon Valley
- Decentralized P2P blockchain protocols experience
- Hardware and software competencies
- System-on-a-chip expertise
- Global Advisory board

Blockchain will be the new network with an explosive growth in new users, and a new category of Blockchain Service Providers (BSPs) such as Splend will dominate.
